

----- PRESS RELEASE -----

February 1, 2004 (Ocoee, FL and Newark, NJ). Transaction Data Systems Inc., provider of the Rx30 Pharmacy Management System, today announced that it has completed an interface to TeleManager Technologies' Interactive Voice Response (IVR) solutions. Rx30 users will now have access to TeleManager's full suite of integrated IVR products and services, from its Refill TeleManager In-Store IVR System to its patented IVR Service, a pay-per-use, outsourced IVR service. The Service enables pharmacies to offer customers the ability to refill their prescriptions over a touch-tone phone without the pharmacy having to install any in-store hardware, software or dedicated phone lines.

"We have selected TeleManager as one of our interface partners because of the unique value and extensive functionality they bring to our customer base," says Steve Wubker, President of Transaction Data Systems. "TeleManager provides our customers with an easy-to-use suite of products and services that enable them to meet their prescription refill requirements at any price point. Several of our customers were so happy with the TeleManager solution that they were already using TeleManager's IVR before the interface was even completed!"

Joseph Caruso, CEO of Telemanager Technologies, says "The number of Rx30 customers that have so quickly adopted TeleManager is a testament to the value of our suite of IVR solutions. They understand that by adding TeleManager to their Rx30 system, they can drastically improve the productivity, customer service and profitability of their pharmacy operations. We intend to continue to provide all pharmacies with a choice of IVR solutions, and we are thankful to Rx30 for recognizing our value in the independent pharmacy marketplace."

Transaction Data Systems has more than 2,000 independent pharmacy customers using its Rx30 Pharmacy Management System. For over 25 years, Rx30 has been the innovative leader in streamlining the processes and procedures that are so critical to a Pharmacist's daily productivity. Transaction Data Systems can be reached at (800) 289-7930 or at www.rx30.com.

TeleManager Technologies, Inc. is a leading provider of productivity solutions for the retail and institutional pharmacy industry.
